

MUPPIDI CHANDANA

Coimbatore, India – 641001 | 7418597139 | muppidichandana76@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

AI & ML enthusiast and CSE undergraduate passionate about solving real-world problems with technology. Skilled in full-stack development, distributed systems, and accessibility solutions. Aspiring to contribute meaningfully to dynamic organizations while continuously learning and working on impactful projects in AI, healthcare, and web development.

Technical Domain

Domains: Machine Learning, Natural Language Processing, Full Stack Web Dev, Security Systems, Distributed Systems, Accessibility Technologies

Programming: Python, Java, C, C++ **Web:** HTML, Tailwind, CSS, JavaScript **Tools:** Matlab, Excel

Frameworks: React, Node.js **Version Control:** Git, GitHub

Experience

Machine Learning Intern

13 April 2026 – 1 June 2026

Banking Delinquency Prediction (MSME Rollward Analysis)

- Developed a machine learning model to predict SMA-0 to SMA-1 delinquency transitions for MSME customers through rollward analysis using historical banking data.
- Performed feature engineering and model development in SAS, leveraging credit risk indicators such as Maximum DPD, delinquency history, utilization, and recovery metrics.
- Evaluated multiple machine learning algorithms, with Gradient Boosting selected as the Champion Model based on its superior validation performance.
- Contributed to the development of an Early Warning System (EWS) to enable proactive risk management and improve collection strategies.

Projects

Food Redistribution & Waste Management System [\[Link\]](#)

Nov 2025 – March 2026

Developed a scalable platform using MERN stack to redistribute surplus food from donors to underserved communities, aiming to reduce food wastage and improve resource utilization. Implemented real-time request matching and logistics coordination to ensure efficient food distribution.

Enterprise Goal Management & Performance Tracking System [\[Link\]](#)

April 2026 – June 2026

Built a full-stack performance management platform (React.js, Vite, Node.js, Express.js, SQLite3) with role-based workflows for Employee, Manager, and Admin. Implemented goal creation with weightage validation, manager approval flows, and shared KPI deployment. Added automated performance scoring, quarterly check-ins, an escalation engine for pending approvals, Recharts analytics dashboards, and CSV export for reporting.

TPA Token-Based Health Insurance Claim System [\[Link\]](#)

May 2025 – July 2025

Designed a secure, multi-role distributed system for real-time claim approvals. Implemented JWT-based role dashboards, token tracking, and secure workflows. Ensured secure MongoDB-backed data transactions with modular APIs.

GenAI Medical Pre-Screening for Psychiatric Patients [\[Link\]](#)

Nov 2025 – March 2026

Built an AI-driven system to assist psychiatrists in early-stage patient screening and assessment by analyzing patient responses and behavioral inputs. Leveraged NLP and designed an adaptive questionnaire system for intelligent response analysis, integrating a full-stack architecture with AI models to support efficient and scalable healthcare workflows.

Education

B.Tech – Computer Science & Engineering (UG, GPA: 8.23) – Amrita Vishwa Vidyapeetham

Senior Secondary (+2), MComPC – 92% – Stanes Higher Secondary School (CBSE)

Secondary (10th) – 89% – Ravindra Bharathi Global School (CBSE)

Professional Certificates

“Technology Job Simulation” – (Deloitte Australia) • “Introduction to Data Science” and “Introduction to NLP” – (Infosys Springboard & IBM) • “Deep Learning” – (Evaluating AI Agents) • “Machine Learning” – (Infosys Springboard) • “5-Day AI Agents Intensive Course” with Google

Hackathon

SIH 2024 – Secure Geo-Attendance Tracker (Flutter, Firebase): GPS-based check-in/out with Firestore & role-based access.

ICSRF 2025 Hackathon – “Top 15 out of 100+ submissions” Visual AI Tutor for Village Students improving learning by 40% (TinkerFlow): Gamified quizzes, AI mentor, offline PDFs, and faculty assistant tools.

Extracurricular Activities

House Captain, Sports • Member, ASCII Newsletter Team • Member, Anokha Techfair

Languages

English – Proficient • Telugu – Native • Hindi – Elementary • Tamil – Elementary

Hobbies

Reading, Coding, Problem Solving, Listening to Music, Playing Badminton
